- ▶ Non-reflective design
- ▶ Pb-free RoHs compliant 3x3 SMT package

### Description

The CMD195C3 is a broadband MMIC SPDT switch housed in a leadless 3x3 mm surface mount package. The CMD195C3 covers DC to 18 GHz and offers a low insertion loss of 2 dB and high isolation of 37 dB as well as positive gain slope. The positive gain slope feature allows for several switches to be cascaded together without the need for gain equalization circuitry. The CMD195C3 operates using complementary control voltage logic lines of 0/-5 V and requires no bias supply.
